Subject: Re: Juneau Co Data - update

Jim - Cheryl is working with the labs to get the data finalized before it gets released (verifying holding times, QA, etc) and updated to an **internal** website by June 29th. Our plans are to share the information with Wisconsin DNR the week of July 2nd to review. We plan to make the website public by July 9th; at that time we will make the website address known to the FOIA Requester.

Jim - Cheryl has received all the data, but she needs some explanations by the laboratories if holding times were met and explanations for some of the data results.
